Abstracts

The global Motherwort Extract Capsules market size is expected to reach $ 108 million by 2032, rising at a market growth of 6.7% CAGR during the forecast period (2026-2032).

Motherwort extract capsules are an oral gynecological proprietary Chinese medicine or herbal capsule formulation. They are produced using motherwort (or fresh motherwort) as the primary raw material through processes such as extraction, concentration, drying, and granulation (or preparation of soft capsule fill material), followed by hard capsule filling or soft capsule encapsulation. These products are primarily positioned for applications related to gynecological menstrual regulation and postpartum recovery. The upstream supply chain encompasses motherwort cultivation and harvesting, year-round supply of fresh motherwort, processing of herbal pieces, motherwort extract, capsule shells (gelatin or plant-based materials), soft capsule ingredients (vegetable oil, glycerin, beeswax), packaging materials (aluminum-plastic blisters, paper cartons), and quality testing equipment. The midstream sector involves TCM extraction, concentration, capsule filling or soft capsule encapsulation, drying, packaging, stability testing, and registration/brand sales. Downstream customers primarily include hospital gynecology departments, maternal and child health institutions, pharmacies, e-commerce platforms, primary healthcare facilities, and overseas retail channels for herbal supplements.
