## Abstracts

The global Motor Bearing market size is expected to reach \$ 18513 million by 2032, rising at a market growth of 7.0% CAGR during the forecast period (2026-2032). Global sales of motor bearings reached 165 million units in 2025, with an average price of \$68 per unit.

Motor bearings (also known as motor bearings) are precision components specifically designed to support the rotor of a motor, guide its rotation, and bear the load on the shaft. Their core requirements are low friction, high speed, low noise, and long lifespan. Common types include deep groove ball bearings, angular contact ball bearings, cylindrical roller bearings, self-aligning ball bearings, and self-aligning roller bearings, covering different operating conditions such as general industrial motors, high-speed servo motors, and heavy-duty wind turbine motors.

The main raw material for motor bearings is high-carbon chromium bearing steel (GCr15/GCr15SiMn). The raceways and rolling elements are generally made of vacuum-degassed bar stock. Cages are classified by grade as stamped steel, solid brass, or engineering plastics. Seals are mostly made of nitrile rubber. Bearing steel accounts for approximately 45% of raw material procurement costs, and overall raw material costs account for about 70% of the ex-factory price, making it the largest cost item. Grinding, heat treatment, ultra-precision grinding, and testing account for approximately 25% of the total cost, while labor and energy consumption account for 10%. Due to the high market concentration of bearing steel and the direct transmission of price fluctuations downstream, raw materials consistently account for around 90% of the final product's BOM (Bill of Materials), having the greatest impact on manufacturers' profit elasticity. This report studies the global Motor Bearing production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Motor Bearing and provides market size (US\$ million) and Year-over-Year (YoY) Growth,
