Rare Earth Magnet is the largest segment, holds a share around 76%, and in terms of application, Automotive is the largest application, with a share nearly 30%.

A permanent magnet is a substance that, like a magnet, has a magnetic field without the need for an external current. Generally, permanent magnet materials are used as the magnetic poles of the motor. The main function of the permanent magnet of the motor is to generate a magnetic field. During the rotation process, the winding cuts the magnetic induction line generated by it to generate electricity, and vice versa.
