Abstracts

The motorcycle eCall system could decrease the response time of emergency services by instantly providing accurate information in the event of an accident.

Scope of the Report:

This report studies the Motorcycle e-Call market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Motorcycle e-Call market by product type and applications/end industries.

The lack of protection for the rider and the vehicle is one of the primary reasons for such high fatality conversion rates. In addition to normal crashes, improper lane changing also results in severe injuries or fatalities to motorcyclists. In such a scenario, the e-Call system reduces the service response time thereby reducing the risk of conversion of accidents into fatalities.

The e-Call system reduces the emergency service response time by about 50%.

Therefore, it paved its adoption in the automotive segment; it will soon be commercialized in the motorcycle segment. However, this does not stop the further developments in the system by suppliers

The global Motorcycle e-Call market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.
