## **Abstracts**

The auto industry is increasingly being driven by changing consumer needs that pertain to the increasing purchasing power in the economy. Automakers are predisposed to develop different categories of two-wheelers that cater to the needs of a diverse market. Progressive growth of technology has driven OEMs to equip two-wheelers with high-performance engines with sophisticated controls, sensors, and electronic control units (ECUs) for optimizing performance. Modern two-wheelers are equipped with sensors that relay information regarding the output to the ECU. The ECU acts like the brain of the system and optimizes performance accordingly.
