Abstracts

According to our (Global Info Research) latest study, the global Motorcycle Stability Control (MSC) market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Motorcycle Stability Control (MSC) is a motorcycle electronic brake control system developed by Robert Bosch GmbH. It is a lean-sensitive variation of the traditional ABS system Anti-lock braking system. The MSC system uses accelerometers and/or gyroscopic sensors to evaluate how close to the limit of adhesion the motorcycle is cornering. It reduces the allowable braking tire slip ratio, reducing the braking force, thus preventing the tire skid, and keeping the motorcycle from falling into the turn, or low-siding.

According to our Motorcycles and Bicycles Research Center, Since 2014, the global motorcycles annual sales have remained at around 50 million units. In 2022, global motorcycle sales was approximately 49 million units. By region, China, India, and Southeast Asia are the main consumer regions for motorcycles, with a combined sales volume of nearly 80%. In terms of regional structure, Asia is the main consumer market for motorcycles, mainly for commuting trips.
