The global Motorcycle Touring Helmet market size is expected to reach \$ 438.7 million by 2029, rising at a market growth of 3.6% CAGR during the forecast period (2023-2029).

A motorcycle touring helmet is a type of helmet designed for long-distance riding on a motorcycle. It is typically characterized by a full-face design with a large visor, providing the rider with excellent protection against wind, rain, and other weather conditions. Touring helmets also tend to have features such as increased ventilation for comfort during extended periods of use, noise-reducing padding, and sometimes even built-in communication systems. They are usually more aerodynamic than other types of helmets, reducing wind resistance and fatigue during long rides.
