Motors for braking systems mean that both ABS and ESC motors are extremely compact and designed for high reliability and durability. In addition, they can be flexibly customized to fit all design specifications. Our motors are based on a scalable motor design that meets all the requirements of future driver assistance systems (ADAS) and allows our customers to modularize their units. Motors for ESC systems have high power density due to the use of high power ferrite magnets. Our motors achieve a power output of up to 800 watts and a service life of up to 1000 operating hours - for all current and future ESC applications. Upon request, metal or plastic front panels can be installed.
