## Abstracts

The motors provide special mechanical properties and systems solutions to end-users and have higher efficiency than standard motors. End-users demand custom-made motors for their tasks as a standard electric motor is insufficient in conjunction with a robust application. They are opting for more customized solutions as per their specific requirements. These motors are sophisticated in operations and have enhanced the market opportunities for low voltage motor and drives manufacturers.

### Scope of the Report:

This report focuses on the Motors and Drives in Discrete in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The rising production costs and demand for high-quality products at low prices have propelled manufacturers across various discrete industries to design automation solutions that boost productivity in plant operations. This has compelled them to implement highly efficient power transmission motor technologies.

Additionally, several manufacturers are highly concerned about the motor efficiency benchmarks imposed by the US government regarding carbon emission and fuel efficiency. Many industries are replacing old electric motors with certified motors of higher operating efficiency because of these new regulations
