Abstracts

The global Mountain and Hill Agricultural Machinery market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

At present, my country's hilly and mountainous areas are mainly concentrated in the southwestern hilly and mountainous areas such as Yunnan, Guizhou, Sichuan and Chongqing, the southern low and gentle hilly areas such as Hunan, Hubei, Jiangxi, Zhejiang, Fujian, Guangdong, Guangxi and Qiong, and the northwest plateau areas such as Shanxi, Shaanxi, Gansu, Ningxia and Qinghai-Tibet. The cultivated land area with a slope of more than 2° in these three regions accounts for The ratios are 89.06%, 52.49% and 69.40% respectively, which are much higher than other regions. The total grain sown area in these three regions accounted for 42.27%, of which the total rice sown area accounted for 66.10%, the total potato sown area accounted for 77.62%, the total oil crop sown area accounted for 57.43%, and the total sugar crop sown area accounted for It accounts for 89.64% of the total area and 59.93% of the total vegetable sown area. It is an important production base for grain, oil, sugar and vegetables in my country and an important rural revitalization area. Judging from the terrain conditions of farmland, compared with plain areas, mountainous and hilly areas have characteristics such as larger slopes, more irregular land parcels, more complex landforms, and worse traffic conditions. Large agricultural machinery that can adapt to plain areas usually cannot It is used in mountainous and hilly areas, so the level of agricultural mechanization in mountainous and hilly areas is relatively low. This also makes the agricultural machinery industry in mountainous and hilly areas huge for development.

Mountain and hill agricultural machinery products refer to agricultural machinery designed and developed mainly for mountain and hill and cash crop operations.
