Abstracts

The global Mouse Pad and Desk Mat market size is expected to reach \$ 8104 million by 2029, rising at a market growth of 5.3% CAGR during the forecast period (2023-2029).

A desk mat protects your desk from the items you place on it. It protects the entire desk from scratches. A mouse pad is designed to protect the desk/table from the computer mouse. It also covers the mouse's bottom to prevent dust accumulation. A desk mat and a mouse pad are used for the same purpose, which is to protect the desk area from any kind of damage. The only difference is that a desk mat offers protection for the entire desk. On the other hand, a mouse pad protects a small space on your desk.
