## Abstracts

According to our (Global Info Research) latest study, the global MRC Suspension market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

Magnetic Ride Control (MRC), also known as MagneRide, is an advanced adaptive suspension technology. It uses magnetorheological fluid within the shock absorbers to adjust the damping rate in real-time based on road conditions and driving dynamics. This fluid contains tiny iron particles that align when subjected to a magnetic field, changing the fluid's viscosity and thus the damping characteristics of the suspension.
