The full name of MS glue is modified silane polyether glue. It is a new generation of building sealant developed after polysulfide glue, silicone glue and polyurethane glue. Due to its outstanding environmental protection characteristics such as formaldehyde-free, isocyanate-free, solvent-free, and affinity to the environment and human body, it is suitable for most building substrates. At the same time, it also has good construction performance, adhesion, durability and weather resistance, especially non-polluting and paintable properties. It has a wide range of applications in building decoration, mainly in the fields of bonding, caulking, jointing, sealing, waterproofing, and reinforcement in construction engineering and decoration. In recent years, as people's understanding of the advantages of MS glue itself continues to deepen, its application in industrial fields such as refrigerated trucks, containers, and elevators is also expanding.
