Abstracts

MS Resin, also known as SMMA, is a transparent copolymer primarily composed of methyl methacrylate (MMA) and styrene monomer (SM). It has excellent transparency, optical property, good weather-resistivity, easy to process, low hygroscopicity, low residual stress for molded products, and therefore economical for many applications.

Scope of the Report:

This report focuses on the MS Resin (SMMA) in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Currently, the key factors driving the growth of the aforementioned industry are optical materials, toys, house appliance such as food container, lamp shade, and other industries. As the demand increases rapidly for house appliance industries, and the wider range of applications, the demand for MS Resin will correspondingly increase. In the past few years, the raw material price was relatively stable. However, the improvement of energy, transportation costs, employee wages, and equipment depreciation will play a significant role in promoting the cost of MS Resin. The downstream industry has higher requirement for MS Resin, and the environment protection pressure make the companied spend more cost on process technology. Therefore, to some extent, the MS Resin companies face the risk of profit decline. There are companies adding new capacities and aims at the cost and quality leadership which shall improve profitability. The competition in MS Resin market will become more intense.

Japan, Greater China Taiwan, Singapore and USA have achieved MS Resin industrialization and applied in many fields. And there products are exported to other

countries worldwide. However, there are no MS Resin manufacturers in China mainland market. All of MS Resin used in China mainland is imported, especially from China Taiwan and Japan.

The worldwide market for MS Resin (SMMA) is expected to grow at a CAGR of roughly 4.0% over the next five years, will reach 460 million US\$ in 2023, from 360 million US\$ in 2017, according to a new GIR (Global Info Research) study.
