## Abstracts

The global Mulberry Juice market size is expected to reach \$ 2734 million by 2032, rising at a market growth of 4.2% CAGR during the forecast period (2026-2032).

Mulberry juice is a natural beverage made from the fruit of the mulberry tree (*Morus alba*), a plant in the Moraceae family, through processes such as pressing, filtering, and sterilization. It is purplish-red in color, with a sweet and sour taste, and is rich in anthocyanins, resveratrol, flavonoids, vitamin C, protein, minerals (calcium, iron, zinc, selenium, etc.), as well as various amino acids and pectin. Its vitamin C, essential amino acid, and selenium content is significantly higher than that of fruits such as apples, peaches, and kiwis.

### Main Benefits:

**Antioxidant and Anti-aging:**Anthocyanins and resveratrol can scavenge free radicals, reduce oxidative damage to cells, help delay skin aging, and improve dull skin tone.

**Eye Protection and Relief of Eye Fatigue:**Anthocyanins help regenerate retinal cells, making it suitable for people who use electronic products for extended periods or read for extended periods.

**Iron and Anemia Relief:**Iron and vitamin C work synergistically to promote hemoglobin synthesis, making it suitable for women and those recovering from surgery.

**Relief of Constipation:**The dietary fiber and fruit acids in mulberry juice can promote intestinal peristalsis and relieve constipation. **Boosting Immunity:** Polysaccharides can regulate immune function and enhance disease resistance.

**Other Health Benefits:** Traditional Chinese medicine believes that mulberries are sweet and cold in nature, possessing the effects of nourishing the liver and kidneys, promoting body fluid production and moisturizing dryness, and improving hair health and eyesight.

In 2025, global mulberry juice sales reached 697 million liters, with a production capacity of approximately 240 million liters, an average selling price of US\$2.85 per liter, and an average gross profit margin of 30%-38%.
