According to our (Global Info Research) latest study, the global Multi-Angle Handheld Spectrophotometer market size was valued at US$ million in 2025 and is forecast to a readjusted size of US$ million by 2032 with a CAGR of %during review period.

A multi-angle handheld spectrophotometer is a portable device designed to measure the color and reflectance of surfaces from multiple angles. Unlike standard spectrophotometers that measure reflectance from a single angle, multi-angle versions can capture data at various angles, providing more comprehensive information about how a material's color appears under different viewing conditions. This device is particularly valuable in industries where the appearance of a product under various lighting and viewing conditions is essential, ensuring that the final product meets both aesthetic and functional requirements.
