## Abstracts

The global Multi Axis Positioner market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Multi-Axis Positioner is essential for test, metrology, and manufacturing in many high-tech industries. PI designs and manufactures multi-axis positioners based on 3-phase linear motors, torque motors, piezo motors, voice-coil motors, servo and stepper stages in both serial-kinematics and parallel kinematics (Stewart platform) configurations. Serial kinematics multi-axis positioners consist of a combination of individual linear slides, XY-stages, rotary tables, and goniometric stages, while parallel kinematics positioners are integrated and cannot be separated into individual axes.

This report studies the global Multi Axis Positioner production, demand, key manufacturers, and key regions.
