## Abstracts

According to our (Global Info Research) latest study, the global Multi-channel RF Connector market size was valued at US\$ 1527 million in 2025 and is forecast to a readjusted size of US\$ 2993 million by 2032 with a CAGR of 10.1% during review period.

In 2025, global Multi-channel RF Connector production reached approximately 9.89 million units, with an average global market price of around US\$150 per unit.

A multi-channel RF connector (often called a multiport or multi-coax connector) integrates multiple coaxial RF contacts of the same interface into a single housing/module to achieve higher interconnect density, support blind-mating, and shorten installation time while maintaining controlled-impedance RF performance over a specified frequency range. It is widely used in wireless infrastructure, test & measurement, radar/aerospace electronics, RF modules, and board-to-board RF interconnects.

Upstream materials/components include high-conductivity copper alloys/brass or beryllium-copper spring contacts, precious-metal plating (typically gold/silver), dielectric insulators (PTFE, LCP, PEEK, etc.), stainless/aluminum housings, springs/alignment parts, precision molding & machining, plus cable assemblies and shielding structures. Midstream manufacturers design the coax geometry (impedance control and isolation), package multiport arrays/modules, implement blind-mate guidance and float compliance, and develop PCB/chassis mounting. Downstream applications span 5G/6G RF infrastructure and front-ends, phased-array radar/avionics, ATE systems, satellite communications, and high-end industrial/medical imaging. Representative upstream

suppliers include copper alloys (Aurubis, Wieland), BeCu (Materion), PTFE (Chemours), PEEK (Victrex), and LCP (Celanese), plus plating chemistry/process providers; representative downstream companies include Ericsson/Nokia (wireless infrastructure), Keysight/Rohde & Schwarz (test & measurement), and Raytheon/Lockheed Martin (aerospace & defense). The value of multiport connectors—high density, blind mating, reliability—is exemplified in Radiall's multiport connector descriptions.

The annual production capacity of a single-line Multi-channel RF Connector is approximately 9.89 million units, with a gross profit margin of approximately 30%-50%.
