According to our (Global Info Research) latest study, the global Multi-flow Control Valve for BEV market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The flow control valve, also known as 400X flow control valve, is a multi-function valve that uses high-precision pilot mode to control the flow. It is mostly used in the pipeline where the flow and pressure of the distribution pipe need to be controlled, such as the shower, faucet and lawn watering system. It keeps the predetermined flow unchanged, limits the excessive flow to a predetermined value, and reduces the upstream high pressure appropriately, even if the upstream pressure of the main valve changes, It will not affect the flow downstream of the main valve.
