Multi-focal contact lenses are a type of soft vision correction lenses that, unlike traditional single-focus contact lenses, offer multiple focal points on a single lens to cater to the needs of vision at different distances. These lenses enable the wearer to achieve relatively clear vision when viewing objects both at near and far distances, making them suitable for correcting presbyopia, as well as combined myopia and presbyopia. Like ordinary myopia contact lenses, this type of lens also comes in daily disposable, monthly disposable, and other varieties, allowing individuals to choose the appropriate lens based on their prescription.
