A multi-function nursing electric bed is a type of bed designed for hospitals or nursing facilities, equipped with various functions to meet patients' nursing needs. These beds typically come with electric adjustment capabilities, allowing for alterations in bed height, angles, and positions to ensure patient comfort during rest or treatment. Moreover, multi-function nursing electric beds may also include side rails, guardrails, and other additional features that facilitate caregivers' operations to ensure patient safety and convenience. With the increasing demand for higher quality medical care, the need for multi-function nursing electric beds in healthcare facilities is continually growing.

The multifunctional electric bed is a device that changes the position of the bed through an electrical control system. The multifunctional electric bed provides complex postures for clinical needs such as back, bent legs, full lift, full forward tilt, full back tilt, etc., which is convenient for nursing staff to operate and can effectively reduce the labor intensity of nursing staff.
