## Abstracts

A printer is a device that takes inputs like texts or graphics from computers and prints on paper. Printers are mainly of two types: impact and non-impact. Impact printers such as dot-matrix printers use forcible impact to reproduce text and images on paper. They use print heads that strike the surface of ink ribbons, pressing the ribbons against the paper. On the other hand, non-impact printers, including inkjet and laser printers, print without mechanical impact on the paper.
