Multi-lane Stick Pack Machine is a high-efficiency packaging system designed to produce and fill multiple narrow, tube-like pouches—commonly known as stick packs—simultaneously across several vertical lanes. These machines are widely used for packaging granular, powdered, or liquid products in small, single-dose formats. They are engineered to handle high-speed operations and are ideal for maximizing productivity in limited floor space. Each lane operates in parallel, forming, filling, and sealing the stick packs with high accuracy and consistency using heat sealing or ultrasonic technology, depending on the product and film material.
