According to our (Global Info Research) latest study, the global Multi-laser SLM System market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

Multi-laser SLM System is a SLM 3D printer with multiple lasers. SLM (selective laser melting) is one of the laser powder bed fusion technologies. It is a laser-based 3D printing technology in which metallic powder materials are selectively melted layer by layer to produce 3D objects. Since the build space is filled with an inert, i.e. inert, shielding gas such as nitrogen or argon, the metal runs little risk of oxidizing, which would render the printed components unusable.
