A multi-layer seed paper bag is an advanced version of the traditional seed paper bag, designed to offer enhanced durability and functionality while retaining its eco-friendly characteristics. These bags consist of multiple layers of biodegradable paper, each embedded with seeds. The layered construction provides additional strength, making the bags suitable for carrying heavier items. After their use, the bags can be planted in soil, where the layers decompose and the seeds germinate, growing into various plants. This innovation not only promotes sustainability by reducing waste but also supports biodiversity, making it a preferred choice for environmentally conscious individuals and businesses.
