Multi-Level Protection Scheme Solution refers to a professional cybersecurity compliance assessment service built around China's classified protection regime for cybersecurity, commonly known as MLPS or DJCP. The service is primarily applied to information systems, communication network facilities, cloud computing platforms, big data platforms, industrial control systems, IoT systems, mobile internet systems, and other classified protection objects operating in China. Typical service activities include system classification support, filing preparation, gap assessment, technical and management control evaluation, on-site interviews, vulnerability scanning, configuration review, control verification, remediation recommendations, re-assessment, and formal assessment reporting. Its technical scope covers identity authentication, access control, security audit, intrusion prevention, malware protection, data integrity, data confidentiality, backup and recovery, security management systems, security operations, and extended requirements for cloud computing, industrial control, IoT, mobile internet, and big data scenarios.
