A multi-person hyperbaric oxygen chamber is a medical device used to treat medical conditions, usually consisting of a closed room or chamber that can provide a high concentration of oxygen and a high pressure environment. It is a common therapeutic tool used to treat a variety of conditions. In a multi-person hyperbaric oxygen chamber, the patient stays in it for a certain period of time, usually several hours. During this time, the high concentration of oxygen and pressure can promote tissue healing and cure disease. Because this treatment increases oxygen levels in the tissues, which speeds up the body's ability to heal itself.
