Multi-Person Negative Pressure Isolation Tent is a temporary medical isolation facility that accommodates multiple people while maintaining negative pressure airflow. It helps reduce airborne contamination risk in emergency response, infectious disease control, field clinics, and public health preparedness.

The industrial chain includes upstream tent fabrics, frames, HEPA filters, blowers, sensors, ducts, zippers, and control units. Midstream covers tent design, sewing, frame assembly, airflow integration, leakage testing, and packaging. Downstream applications mainly include hospitals, quarantine sites, field clinics, emergency response, disaster relief, and public health reserves.

Public health emergency support, field medical rescue and epidemic prevention isolation requirements promote the upgrading of multi-person negative pressure isolation tents. The negative pressure airflow isolation structure effectively blocks cross infection of pathogens and allows rapid deployment in outdoor environments. Modular assembly and supporting ventilation purification functions further improve emergency medical carrying capacity.
