Abstracts

According to our (Global Info Research) latest study, the global Multi-pet Insurance market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

Multi-pet insurance is a type of insurance policy that covers multiple pets under one policy. This type of insurance is becoming increasingly popular among pet owners who have more than one pet. The development prospect of multi-pet insurance is quite promising as it offers a range of benefits to pet owners and insurance companies alike.

One of the main benefits of multi-pet insurance is that it is more cost-effective than purchasing separate policies for each pet. This is particularly attractive to pet owners who have multiple pets, as it can save them a significant amount of money on insurance premiums.

Another benefit of multi-pet insurance is that it simplifies the insurance process for pet owners. Rather than having to manage multiple policies, pet owners can manage all their pets' insurance needs under one policy. This makes it easier to keep track of payments, renewals, and claims.
