## Abstracts

According to our latest research, the global Multi-Ply Built-Up Roofing market size will reach USD 1214 million in 2031, growing at a CAGR of 4.2% over the analysis period.

Multi-Ply Built-Up Roofing, also called BUR, is the most common roofing material used on low-slope roofs. It is composed of alternating layers of reinforcing fabric and bitumen (asphalt) and is finished with a top layer of aggregate, such as stone or gravel. Multi-Ply Built-Up Roofing is preferred for low-slope, or “flat,” roofs because it creates a continuous sealed surface. By contrast, roof shingles are not sealed and require a fairly steep roof slope to shed water effectively.
