## Abstracts

According to our (Global Info Research) latest study, the global Multi-Storey Car Parks market size was valued at USD 2993.2 million in 2023 and is forecast to a readjusted size of USD 3639.6 million by 2030 with a CAGR of 2.8% during review period.

Multi-storey car parks, also called automated (car) parking system (APS), is a mechanical system designed to minimize the area and/or volume required for parking cars. Like a multi-story parking garage, an APS provides parking for cars on multiple levels stacked vertically to maximize the number of parking spaces while minimizing land usage. The APS, however, utilizes a mechanical system to transport cars to and from parking spaces (rather than the driver) in order to eliminate much of the space wasted in a multi-story parking garage. While a multi-story parking garage is similar to multiple parking lots stacked vertically, an APS is more similar to an automated storage and retrieval system for cars.
