Abstracts

Multi-tenant data centers are data centers that are operated by third parties for multiple enterprise tenants. They are also called as colocation data centers. There are generally two types of multi-tenant data centers: Retail colocation, and Wholesale data centers. Retail colocation facilities are shared facilities where enterprises can rent space and host their IT equipment within the racks provided by the colocation vendors. A wholesale data center is a facility that is offered by the colocation vendor for exclusive and dedicated use.

Scope of the Report:

This report studies the Multi-tenant Data Center market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Multi-tenant Data Center market by product type and applications/end industries.

The hardware infrastructure in SDDCs is managed through intelligent software systems and these data centers support both cloud computing services and legacy applications.
