Multiaxial carbon fiber cloth is a composite material made by weaving carbon fiber bundles in multiple directions, offering excellent strength, stiffness, and heat resistance. It is typically constructed from several layers of carbon fibers oriented at various angles, such as 0°, 90°, and  $\pm 45^\circ$ , to enhance its mechanical properties in different directions. This type of fabric is widely used in industries such as aerospace, automotive, sporting goods, marine, and wind energy, particularly for structural components that require high strength and lightweight materials. Its multi-directional reinforcement allows it to withstand higher loads and impacts, offering superior durability and reliability.
