## Abstracts

According to our (Global Info Research) latest study, the global Multichannel Order Management market size was valued at USD 1274.6 million in 2023 and is forecast to a readjusted size of USD 2217.2 million by 2030 with a CAGR of 8.2% during review period.

Multichannel Order Management (MOM) are B2B software intended for merchants with a primary focus on online commerce. MOM address two key concerns. First, they consolidate orders across all channels into the same physical inventory. Second, when prices are changed, they dispatch the new prices across all channels. Some MOM go beyond those basic needs and act as full commerce management solutions.

North America is expected to hold the largest market size in the multichannel order management market during the forecast period. North America is expected to dominate the overall market and is considered to be the most advanced region in terms of technological adoption. This is mainly due to the presence of various developed economies, such as the US and Canada, and their focus on innovations obtained from R&D and technology. Asia Pacific (APAC) is expected to grow at the highest CAGR during the forecast period. Several factors are expected to drive the market's significant growth in the APAC region. With the increasing pressure to achieve greater business agility, more IT organizations in the APAC region are planning to adopt the multichannel order management environment to function properly, improve operational efficiency, and reduce cost. There is a huge market potential for enterprises in this region; this potential can be leveraged to create better business opportunities.
