Abstracts

The global Multifunctional Information Pole market size is expected to reach \$ 1036.8 million by 2030, rising at a market growth of 9.1% CAGR during the forecast period (2024-2030).

According to our research, the number of global connected IoT devices was about 14 billion, grew by 18% compared to 2021. The data released by the Office of the Central Cyberspace Affairs Commission shows that, by the end of 2022, China has built and opened a total of 2.3 million 5G base stations. 110 cities across the country have reached the gigabit city construction standards. Gigabit optical network has the ability to cover more than 500 million households. IPv6 scale deployment application is deeply promoted. The number of active users exceeds 700 million, mobile network IPv6 traffic accounted for nearly 50%. The total size of China's data center racks exceeds 6.5 million standard racks, with an average annual growth rate of more than 30% in the past five years.

After ushering in the blessing of smart sensors, on the basis of power transmission, the traditional power network has gradually become an energy Internet network, and utility poles have also begun to become urban data transmission platforms.
