According to our (Global Info Research) latest study, the global Multifunctional Scrubber market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The multifunctional scrubber can directly spray disinfectant onto the surface of an object, washing and adsorbing pollutants. During the cleaning process, the radioactive waste liquid will be sucked and collected by the vacuum system into the built-in wastewater tank of the equipment, thoroughly removing pollutants from the surface of the object. Equipped with a dedicated soft brush head, it can perform decontamination, washing, and disinfection treatment on the surface of the human body. This equipment is equipped with three activated carbon filters and a defoaming tank to prevent pollutants from spreading into the environment through the airflow.
