The global Multifunctional Turn-over Nursing Bed market size is expected to reach \$ 2544 million by 2032, rising at a market growth of 4.9% CAGR during the forecast period (2026-2032).

Nursing beds are generally powered beds, which are divided into electric or manual nursing beds. They are designed according to the patient's bedridden habits and treatment needs, and are designed with family members to accompany them. They have multiple nursing functions and operating buttons, and are insulated and safe beds. In 2025, global Multifunctional Turn-over Nursing Bed production reached approximately 2211 k units, with an average global market price of around 800 US\$/Unit. The production capacity of Multifunctional Turn-over Nursing Bed reaches 2900 k units, and the industry's gross profit margin is approximately between 25% and 45%.

The market for multifunctional turn-over nursing beds continues to grow, primarily driven by an aging population, a rising number of long-term bedridden patients, and expanding needs for chronic disease care. Hospitals, nursing homes, and home care settings are increasingly demanding reduced pressure ulcer risk, improved patient comfort, and reduced workload for caregivers, making automatic turning, electric position adjustment, and pressure ulcer prevention features key procurement directions. Staff shortages and rising long-term care costs are also prompting medical and nursing homes to accelerate the introduction of automated care equipment to improve efficiency and patient safety. Simultaneously, the trend towards home-based elderly care and home rehabilitation is rapidly increasing demand for home-use intelligent turning and nursing beds, with consumers paying more attention to ease of operation, quiet operation, and remote monitoring capabilities. The application of sensors, IoT, and intelligent control technologies is further driving product upgrades towards intelligent, connected, and

personalized care, while the growing demand for rehabilitation medicine, post-operative recovery, and intensive care continues to drive the expansion of the high-end multifunctional turning and nursing bed market.
