Abstracts

The global Multifunctional Ultrasonic Osteotome market size is expected to reach $ 571 million by 2032, rising at a market growth of 7.8% CAGR during the forecast period (2026-2032).

The multifunctional ultrasonic osteotome is a modern surgical device typically composed of a main unit, a handpiece, working tips, irrigation tubing, and a foot pedal. Utilizing the principle of high-frequency ultrasonic oscillation, it enables precise cutting of bone tissue while effectively protecting soft tissues such as nerves and blood vessels; it is widely used in fields including dental implantology, orthodontics, maxillofacial surgery, and spinal surgery. In 2025, global Multifunctional Ultrasonic Osteotome production reached approximately 8,250 units, with an average global market price of around 40 K US$/Unit.

The growth of the multifunctional ultrasonic osteotome market is primarily driven by the rising number of complex orthopedic procedures, advancements in minimally invasive surgery, and an increasing demand from hospitals for integrated surgical energy platforms. As the population ages and the prevalence of conditions such as degenerative spinal diseases, fractures, craniomaxillofacial deformities, and neurosurgical bone lesions rises, medical institutions are increasingly seeking bone-handling equipment that offers precision, safety, and suitability for complex anatomical regions. By allowing for the interchange of handpieces, tips, or functional modules on a single main unit, these multifunctional devices enable bone cutting, grinding, drilling, tissue fragmentation and aspiration, and the treatment of certain soft tissues; this capability reduces the volume of equipment in the operating room, minimizes instrument switching times, and enhances equipment utilization rates. Compared to traditional bone saws and high-speed drills, these devices typically offer advantages such as lower

vibration amplitude, higher cutting precision, a clearer surgical field, and a reduced risk of injury to adjacent nerves, blood vessels, and soft tissues, leading to their expanding application in spinal, neurosurgical, craniomaxillofacial, and minimally invasive procedures.

Report Scope

This report studies the global Multifunctional Ultrasonic Osteotome production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Multifunctional Ultrasonic Osteotome and provides market size (US$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Multifunctional Ultrasonic Osteotome that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Multifunctional Ultrasonic Osteotome total production and demand, 2021-2032, (Units)

Global Multifunctional Ultrasonic Osteotome total production value, 2021-2032, (USD Million)

Global Multifunctional Ultrasonic Osteotome production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (Units), (based on production site)

Global Multifunctional Ultrasonic Osteotome consumption by region & country, CAGR, 2021-2032 & (Units)

U.S. VS China: Multifunctional Ultrasonic Osteotome domestic production, consumption, key domestic manufacturers and share

Global Multifunctional Ultrasonic Osteotome production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (Units)

Global Multifunctional Ultrasonic Osteotome production by Type, production, value, CAGR, 2021-2032, (USD Million) & (Units)

Global Multifunctional Ultrasonic Osteotome production by Application, production, value, CAGR, 2021-2032, (USD Million) & (Units)

This report profiles key players in the global Multifunctional Ultrasonic Osteotome market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Stryker, Bioventus, mectron, Acteon, NSK-Nakanishi, W&H, EMS, Beijing Shuimu Tianpeng Medical Technology, Beijing Sonicmed, Guilin Woodpecker Medical Instrument, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Multifunctional Ultrasonic Osteotome market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US$ Millions), volume (production, consumption) & (Units) and average price (K US$/Unit) by manufacturer, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
