The global Multifunctional Zeta Potential Analyzer market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Multifunctional Zeta Potential Analyzer is an instrument used to measure the surface charge and particle size of the aggregate. It can calculate the zeta potential by measuring the current and voltage, so as to determine the charge on the surface of the aggregate. In addition, the instrument can measure particle size and analyze particle motion in solution using dynamic light scattering techniques. It can also evaluate stability in solution, such as the effect of surfactant concentration and ionic strength.
