A Multijet Vial Washing Machine is a specialized piece of equipment used in the pharmaceutical and biotechnology industries to clean vials before filling. It utilizes a multijet spray system to deliver high-pressure water or cleaning solution onto the vials, effectively removing contaminants such as particles, dust, or residues from the vial surfaces. The machine typically consists of a rotating turret or carousel where the vials are positioned, and multiple jets or nozzles that spray the cleaning medium onto the vials. This process ensures thorough cleaning and promotes product integrity, minimizing the risk of contamination during the filling process.
