According to our (Global Info Research) latest study, the global Multiphase Pumps market size was valued at USD 248 million in 2023 and is forecast to a readjusted size of USD 352.9 million by 2030 with a CAGR of 5.2% during review period.

Multiphase Pumps that can handle the complete production from a well (oil, natural gas, water and sand, for example) without needing to separate or process the production stream near or at the wellhead. This reduces the cost associated with the surface facilities. Using multiphase pumps allows development of remote locations or previously uneconomical fields. Additionally, since the surface equipment, including separators, heater-treaters, dehydrators and pipes, is reduced, the impact on the environment is also reduced. Multiphase pumps can handle high gas volumes as well as the slugging and different flow regimes associated with multiphase production. Multiphase pumps include twin-screw pumps, piston pumps and helicoaxial pumps.

Global Multiphase Pumps key players include NOV, Sulzer, ITT Bornemann, Leistritz, Flowserve, etc. Global top five manufacturers hold a share about 70%. Europe is the largest market, with a share about 60%, followed by North America, with a share about 40 percent. In terms of product, Twin screw multiphase pumps is the largest segment, with a share about 50%. And in terms of application, the largest application is Onshore, followed by Offshore.
