Abstracts

The global Multiple Rocket Launchers market size is expected to reach \$ million by 2032, rising at a market growth of %CAGR during the forecast period (2026-2032).

A multiple rocket launcher (MRL) or multiple launch rocket system (MLRS) is a type of rocket artillery system. Rockets have different capabilities than artillery, like longer range, and different payloads, for example considerably larger warheads, or multiple warheads. Unguided rocket artillery is notoriously inaccurate and slow to reload, compared to artillery. To overcome this, rockets are combined in systems that can launch multiple rockets simultaneously. Modern rockets can use GPS or inertial guidance, to combine the advantages of rockets with high accuracy.

Splav is the world leader with 40% market shares, Lockheed Martin is the leader in Unites States by 22% market shares, and NORINCO GROUP is the leader in China.
