The global Multipurpose Magnet market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

A magnet is a material or object that produces a magnetic field. Magnetic fields are invisible, but are responsible for a magnet's most remarkable property: the force that pulls on other ferromagnetic materials, such as iron, and attracts or repels other magnets. Multipurpose magnets are those that are not specifically designed to be used with devices such as sensors and encoders.

This report studies the global Multipurpose Magnet production, demand, key manufacturers, and key regions.
