Muriatic acid, also known as hydrochloric acid, is a strong, corrosive acid that is commonly used in various industrial and household applications. It is a colorless liquid with a pungent odor and is highly soluble in water. Muriatic acid is produced by dissolving hydrogen chloride gas in water.

In industrial settings, muriatic acid is used for cleaning and etching metals, removing rust and scale, and adjusting the pH levels in various processes. It is also used in the production of various chemicals, such as vinyl chloride and polyvinyl chloride (PVC).

In household applications, muriatic acid is often used for cleaning and disinfecting purposes. It can be used to remove stains, scale, and mineral deposits from surfaces like concrete, tiles, and masonry. However, it is important to handle muriatic acid with caution as it is highly corrosive and can cause burns and respiratory irritation. Proper safety precautions, such as wearing protective clothing and using it in well-ventilated areas, should be followed when working with muriatic acid.
