Abstracts

The global Music Box market size is expected to reach \$ 15.49 million by 2032, rising at a market growth of -2.8% CAGR during the forecast period (2026-2032).

A music box or musical box is an automatic musical instrument in a box that produces musical notes by using a set of pins placed on a revolving cylinder or disc to pluck the tuned teeth (or lamellae) of a steel comb. They were developed from musical snuff boxes of the 18th century and called carillons ? musique (French for 'chimes of music'). Some of the more complex boxes also contain a tiny drum and/or bells in addition to the metal comb.

As the market is not so optimistic, market sales of major players are also seeing downward trend. Reuge, Sankyo and Yunsheng are top three producers of music boxes, with 80% market share separately.
