Scope of the Report:

This report focuses on the Myasthenia Gravis Drugs in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The market is witnessing the rapid development of novel drugs such as monoclonal antibodies, which is one of the primary factors driving this market's growth prospects. Most drug manufacturers are increasingly focussing on the development of monoclonal antibodies, as they act specifically on target cells; thereby, leading to lower side effects. Since conventional therapies such as acetylcholinesterase inhibitor, oral steroids, and immunomodulatory agents are associated with more side effects, physicians prefer to prescribe high efficacious monoclonal antibodies.
