Mycelium-based meats are alternative protein products made from the root-like structure of fungi known as mycelium. Rich in protein, fiber, and essential nutrients, mycelium has a naturally meaty texture and umami flavor, making it a compelling plant-based substitute for traditional meat. These products are typically grown through fermentation in controlled environments, allowing for sustainable, efficient production with a low environmental footprint. Mycelium-based meats offer a clean-label, allergen-friendly, and eco-conscious option for consumers seeking alternatives to animal-derived proteins.
