Abstracts

The global Mycoplasma Testing market size is expected to reach $ 2601 million by 2032, rising at a market growth of 11.7% CAGR during the forecast period (2026-2032).

The gross profit margin of major companies was approximately 45%–68%.

Mycoplasma Testing detects contamination or infection caused by Mycoplasma species using PCR, culture, enzymatic, immunological, or staining methods. It is primarily applied to biopharmaceutical production, cell cultures, vaccines, gene and cell therapies, research samples, and selected clinical specimens. The scope excludes general bacterial testing, endotoxin testing, sterility testing unrelated to Mycoplasma, and contamination-removal services.

The industrial chain includes upstream primers, probes, enzymes, culture media, antibodies, controls, extraction reagents, and analytical instruments. Midstream covers kit manufacturing, sample preparation, amplification, culture, result analysis, quality control, and laboratory services. Downstream users include pharmaceutical companies, biotechnology companies, cell-therapy developers, contract laboratories, research institutions, and hospitals.

Mycoplasma Testing includes products and services used to detect mycoplasma contamination or infection through culture, biochemical analysis, nucleic acid amplification, immunoassays, and other analytical methods. It is widely used in biopharmaceutical manufacturing, cell and gene therapy, vaccine production, cell culture laboratories, clinical diagnosis, and research institutions. In pharmaceutical production, testing helps prevent contaminated cell substrates, raw materials, and biological products from entering downstream processes or being released to market.

The industry is moving from traditional culture methods toward rapid PCR, digital PCR, automated sample preparation, high-throughput testing, and validated point-of-use solutions. Growth is driven by expanding biologics and vaccine production, increasing cell and gene therapy pipelines, stricter contamination-control regulations, and greater outsourcing to specialized testing laboratories. Rapid methods are gaining adoption because they shorten testing cycles and accelerate batch release. However, method validation, false-positive risks, matrix interference, laboratory quality requirements, and the relatively high cost of rapid-testing systems remain important constraints.

Report Scope

This report studies the global Mycoplasma Testing demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Mycoplasma Testing, and provides market size (US$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Mycoplasma Testing that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Mycoplasma Testing total market, 2021-2032, (USD Million)

Global Mycoplasma Testing total market by region & country, CAGR, 2021-2032, (USD Million)

U.S. VS China: Mycoplasma Testing total market, key domestic companies, and share, (USD Million)

Global Mycoplasma Testing revenue by player, revenue and market share 2021-2026, (USD Million)

Global Mycoplasma Testing total market by Type, CAGR, 2021-2032, (USD Million)

Global Mycoplasma Testing total market by Application, CAGR, 2021-2032, (USD Million)

This report profiles major players in the global Mycoplasma Testing market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Thermo Fisher Scientific Inc., Lonza Group AG, Merck KGaA, Sartorius AG, Hologic, Inc., Roche Diagnostics, QIAGEN N.V., ATCC, Promega Corporation, InvivoGen SAS, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the world Mycoplasma Testing market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US$ Millions), by player, by regions, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
