Abstracts

According to our (Global Info Research) latest study, the global N-BK7 Corner Cube Prism market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

The N-BK7 corner cube prism is made of N-BK7 material and has three mutually perpendicular surfaces and a hypotenuse. Light entering through the hypotenuse is reflected by the three surfaces in turn and emerges through the hypotenuse face parallel to the incident beam, regardless of the direction of the incident beam.

The N-BK7 corner cube prism undergoes three total internal reflections, and the image or light will be emitted in the opposite direction along the original incident direction, which is not sensitive to the incident angle, making it an ideal optical element for retroreflection.
