## Abstracts

According to our (Global Info Research) latest study, the global Natural Oil Polyol market size was valued at USD 362.7 million in 2023 and is forecast to a readjusted size of USD 522.7 million by 2030 with a CAGR of 5.4% during review period.

Natural oil polyols, as the name suggests, are derived from a variety of natural oil sources and hold an impressive environment friendliness quotient owing to their non-polluting, bio-based raw materials. Key varieties of plant oils as well as animal oils used to manufacture polyols include soy oil, palm oil, castor oil, sunflower oil, canola oil, peanut oil, olive oil, mustard oil, lard, and tallow. However, the demand for plant oil polyols is presently much higher than that for animal oil polyols.

Polyols find extensive usage as raw materials in the manufacture of polyurea and polyurethane, both important compounds with vast applications in industries such as construction, paints and coatings, furnishing, and automotive. While a significant share of the global polyol production still heavily involves petroleum and petroleum-derived feedstock, the rising demand for cleaner and environment friendly polyols is bringing about a dynamic shift in the scenario. Production of polyols from natural oils is increasingly gaining traction and the global natural oil polyol is swiftly becoming one of the key arms of the global polyol industry.

The Global Info Research report includes an overview of the development of the Natural Oil Polyol industry chain, the market status of Construction (Soy Oil Polyol, Castor Oil Polyol), Automotive (Soy Oil Polyol, Castor Oil Polyol), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Natural Oil Polyol.
